

Silavent Sapphire Fans...

...style and serenity for bathrooms
and kitchens.

Ultra quiet ventilation
combined with style
and efficiency.

Stylishly designed to discreetly complement modern interior design schemes, our **NEW** Silavent Sapphire Decentralised Mechanical Extract (dMEV) and intermittent extract fan range offers exceptionally high levels of energy efficient performance and operate very quietly.

- Stylish modern design to suit internal décor
- Very quiet performance (down to 12dB(A) for dMEV and 32dB(A) for intermittent fans)
- Ability to interchange or mix and match axial fascia options
- Green Line versions available to reduce energy usage and comply with Building Regulations
- Help lower a property's Dwelling Emission Rate (DER) and therefore provide a higher SAP rating.

 Our Silavent Sapphire fan range includes low voltage (SELV) variants and a variety of control options such as timer, pull cord, humidistat and PIR sensors.

The difference between dMEV and intermittent extract

Silavent Sapphire dMEV fans offer continuous low level ventilation to a single wet room, coupled with virtually silent operation.

Whilst Silavent Sapphire intermittent extract fans also provide quiet levels of performance, they operate intermittently either under occupant or automatic control.

Mix and match stylish 100mm axial fan fascia options to suit your interior design scheme! Visit polypipe.com/ventilation/fans for more information.

Silavent Sapphire dMEV Units

Our highly efficient Silavent Sapphire dMEV range offers continuous low level ventilation – to a single wet room, coupled with virtually silent operation.

100mm Energy Efficient Axial

SAPPHIRE RANGE

GREEN LINE PRODUCTS

- Provides very quiet levels of continuous ventilation to a single wet room, down to 12 dB(A)
- Comply with current Building Regulation requirements
- Stylish fascia to fit interior design scheme
- Extremely low SFP down to 0.19 W/(l/s)
- Ability to interchange fascia options

SUITABLE FOR BATHROOM TOILET UTILITY KITCHEN

PREMIUM IDEAL FOR NEW BUILD & REPLACEMENT

100mm Energy Efficient Centrifugal

SAPPHIRE RANGE

GREEN LINE PRODUCTS

- Provides very quiet levels of continuous ventilation to a single wet room, down to 18 dB(A)
- Comply with current Building Regulation requirements
- Stylish fascia to fit interior design scheme
- Extremely low SFP down to 0.29 W/(l/s)

SUITABLE FOR BATHROOM TOILET UTILITY KITCHEN

PREMIUM IDEAL FOR NEW BUILD & REPLACEMENT

Intermittent Extract Fans

Silavent Sapphire Axial, Centrifugal and In-Line Fans

Our quiet range of stylish Silavent Sapphire bathroom and kitchen fans provides rapid local extraction and includes axial, centrifugal and in-line options.

100mm Axial

SAPPHIRE RANGE

- Quiet in operation down to 32 dB(A)
- Stylish fascia to fit interior design scheme
- Ability to mix and match fascia options
- Extract up to 23l/s (230V)
- Ideal for short duct runs

PREMIUM SUITABLE FOR BATHROOM TOILET

Energy Efficient

GREEN LINE PRODUCTS

- Comply with current Building Regulation requirements
- Offer a low SFP down to 0.22 W/(l/s)
- Reduces carbon emissions

IDEAL FOR NEW BUILD & REPLACEMENT

Standard

- Extract rates comply with current Building Regulation requirements
- Provides effective ventilation

IDEAL REPLACEMENT

150mm Energy Efficient Axial

SAPPHIRE RANGE

GREEN LINE PRODUCTS

- Comply with current Building Regulation requirements
- Offer a low SFP down to 0.48 W/(l/s)
- Stylish fascia to fit interior design scheme
- Quiet in operation down to 49 dB(A)
- Reduces carbon emissions
- Extract up to 60l/s
- Ideal for short duct runs

SUITABLE FOR KITCHEN TOILET

PREMIUM

FOR NEW BUILD & REPLACEMENT

100mm Energy Efficient In-Line Axial

SAPPHIRE RANGE

GREEN LINE PRODUCTS

- Comply with current Building Regulation requirements
- Offer a low SFP down to 0.22 W/(l/s)
- Quiet in operation down to 32 dB(A)
- Optional ceiling LED light with grille
- Reduces carbon emissions
- Extract up to 23l/s
- Ideal for shower applications

SUITABLE FOR BATHROOM TOILET

PREMIUM

IDEAL FOR NEW BUILD & REPLACEMENT

100mm Centrifugal

SAPPHIRE RANGE

- Quiet in operation down to 38 dB(A)
- Stylish fascia to fit interior design scheme
- Extract up to 19l/s (230V)
- Ideal for longer duct runs

PREMIUM SUITABLE FOR BATHROOM TOILET

Energy Efficient

GREEN LINE PRODUCTS

- Comply with current Building Regulation requirements
- Offer a low SFP down to 0.39 W/(l/s)
- Reduces carbon emissions

IDEAL FOR NEW BUILD & REPLACEMENT

Standard

- Extract rates comply with current Building Regulation requirements
- Provides effective ventilation

IDEAL REPLACEMENT
