Access door 135 (110mm & 160mm)

- Set out centre lines as described on inside of access door. Check aperture will be parallel with axis of pipe (Fig.11).
- Drill two overlapping holes of correct size at 45mm centres (Fig.12).
- Remove sides of aperture using a medium file (Fig.13).
- Slacken door to its fullest extent. Push the inner part of the door into the hole at a slight angle turning at the same time. When it is fully entered, turn it parallel to the axis of the pipe ensuring that the inner part locates into the hole. (Fig.14).
